

Nuclear Energy Information Service

Presents our November 2021 public meeting:

“Night With The Experts”

Guy McPherson

Discussing

***“How Do We Respond to Abrupt, Irreversible
Climate Change?”***

Dr. McPherson focuses on the natural world, with a particular emphasis on the twin sides of our fossil-fuel addiction: (1) global climate change and (2) decline of fossil energy. Because these phenomena impact every aspect of life on Earth, specific topics range widely, and include philosophy, evolution, economics, humanity, politics, current events, and many aspects of the human condition.

Thursday, November 18, 2021, 7 p.m. Central Time at Zoom link:

Dr. Guy McPherson is an internationally recognized speaker, award-winning scientist, and the world’s leading authority on abrupt climate change leading to near-term human extinction. He is professor emeritus at the University of Arizona. His published works include more than a dozen books and hundreds of scholarly articles. Professor McPherson has been featured on television and radio and in several documentary films. He is a blogger and cultural critic who speaks to general audiences around the globe, and to scientists, students, educators, and not-for-profit and business leaders who seek their best available options when confronting Earth’s cataclysmic changes.

In 2019 Dr McPherson received the Jazz for Peace Award. Please visit his website “Nature Bats Last” at <https://guymcpherson.com/about/> to learn about his work in more depth.
